Gems I used -

- TTY-Prompt

- Colorize

- Terminal Table

Challenges, Ethical Issues and Favourite Parts

- There were a few challenges, but the biggest one was being able to record the user's info and storing it for them to view later.

- No ethical issues

- Favourite part would be the end result, running the app and being able to do what it's meant to do, it's crazy and I enjoyed my time making it, wasn't easy but got through.

Thank You!
